JEROME STAFF DIRECTOR  
 JIM LIPSKY, DEMOCRATIC STAFF DIRECTOR

April 8, 2019

The Honorable Ann Marie Buerkle  
 Acting Chairman  
 U.S. Consumer Product Safety Commission  
 4330 East West Highway  
 Bethesda, MD 20814

Dear Acting Chairman Buerkle:

I write to express my concern over a report in the *Washington Post* last week indicating that you are using your position as Acting Chairman of the U.S. Consumer Product Safety Commission (CPSC) to restrict Commission staff and fellow Commissioners from investigating and taking action against consumer products that may present a substantial risk of serious injury or death to consumers.

The *Washington Post* article notes that Commission staff had been following reports of injuries from BOB jogging strollers for almost a year and had concluded that a defect with the stroller's front wheel could cause "potentially life-threatening injuries" if the wheel detached. However, rather than initiate efforts for a recall, the article notes that you refused staff requests to force Britax Child Safety, maker of the BOB jogging stroller, to negotiate a corrective action.

This follows on the heels of other reports, in *FairWarning.org* and other outlets, that you personally worked to derail efforts to promulgate a mandatory safety standard for portable generators to prevent deaths and injuries from carbon monoxide poisoning. In fact, the *FairWarning.org* article indicates that you actively worked with industry to even squash a request from your fellow Commissioners asking retailers to voluntarily stock portable generators with additional safety measures.

This is unacceptable. As Acting Chairman of the CPSC, you have a responsibility to allow Commission staff and your fellow Commissioners to perform the work required by the Commission's statutory mandate to protect consumers from unreasonable risk of injury or death from the thousands of consumer products the CPSC regulates.

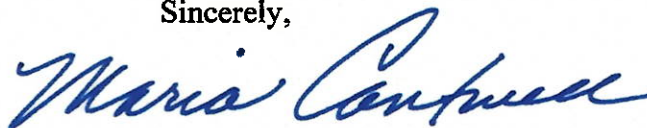

In order to more fully understand the current regulatory environment at the Commission, I hereby request, as Ranking Member of the U.S. Senate Committee on Commerce, Science, and Transportation and pursuant to 15 U.S.C. 2055(a)(7), copies of the following documents:

- 1) Copies of the weekly written Office of Compliance status reports (including any associated documents or presentations) from February 9, 2017, to the present.

- 2) A list of all incident reports received by the Commission (including, but not limited to, Section 15 reports and consumer provided incident reports) associated with the BOB jogging stroller manufactured or distributed by Britax Child Safety.
- 3) Copies of all in-depth investigation (IDI) reports (including all associated attachments or documents) completed by Commission staff associated with the BOB jogging stroller manufactured or distributed by Britax Child Safety.
- 4) Copies of any presentations by Commission staff (including PowerPoint presentations), including copies of notes or meeting logs, to you, the Office of the Chairman, or any other Commissioners offices, concerning the investigation of products manufactured or distributed by Britax Child Safety, including, but not limited to, the BOB jogging stroller.
- 5) Copies of all correspondence, including e-mails, phone logs, and meeting logs, of any communications between employees of Britax Child Safety and you, the Office of the Chairman, or Commission staff from February 9, 2017, to the present.
- 6) Copies of any proposed Corrective Actions Plans or other voluntary recall efforts negotiated by Commission staff concerning products made by Britax Child Safety from February 9, 2017, to the present.
- 7) Copies of any proposed civil penalty actions against Britax Child Safety from February 9, 2017, to the present.
- 8) A list of all instances, including any associated documents, where you directed Commission staff to cease work on, delay, or otherwise impede or limit resources for an investigation of a potentially defective consumer product identified by the Commission's Office or Compliance, a Section 15 report, a consumer defect report (provided by any reporting method, including SaferProducts.gov), or any other reporting mechanism.

Please provide the requested documents as soon as possible, and in no event later than April 22, 2019. Thank you in advance for your assistance with this request.

Sincerely,

MARIA CANTWELL  
Ranking Member

JOHN KEAST, STAFF DIRECTOR  
 DAVID STRICKLAND, DEMOCRATIC STAFF DIRECTOR

June 27, 2019

The Honorable Ann Marie Buerkle  
 Acting Chairman  
 U.S. Consumer Product Safety Commission  
 4330 East West Highway  
 Bethesda, MD 20814

Dear Acting Chairman Buerkle:

Thank you for taking the time to appear before the Senate Commerce Subcommittee on Manufacturing, Trade, and Consumer Protection on June 20, 2019. I appreciated the opportunity to discuss some of the current activities of the Commission, including actions regarding the BOB jogging stroller and the Fisher-Price Rock 'n' Play inclined infant sleeper, and ways the Commission can improve its responsiveness to consumer product defects in the future.

I write today to request information about the Commission's efforts to address the risk of serious product safety hazards in some residential elevators. It is my understanding that the Commission is aware of a number of serious injuries and deaths involving child entrapment between the external hoistway doors and the internal elevator car doors. Many of these elevators appear to be used in rental properties, often in beach and resort communities, that house multiple families or extended families with small children. When entrapments occur in these environments, the results are often catastrophic.

According to statement issued by Commissioner Elliot Kaye on June 19, 2019, the Commission is aware of remedies that could eliminate the entrapment risk posed by the gap between the external doors and the internal elevator car doors. To date, however, it appears that the Commission has taken almost no action to address this risk, or require a suitable recall action.

In order to more fully understand the current regulatory situation at the Commission regarding residential elevator safety, I hereby request, as Ranking Member of the U.S. Senate Committee on Commerce, Science, and Transportation and pursuant to 15 U.S.C. 2055(a)(7), copies of the following documents:

- 1) A list of all incident reports received by the Commission (including, but not limited to, Section 15 reports and consumer provided incident reports) associated with residential elevator entrapment incidents.

The Honorable Ann Marie Buerkle  
June 27, 2019  
Page 2

- 2) Copies of all in-depth investigation (IDI) reports (including all associated attachments or documents) completed by Commission staff associated with residential elevator entrapment incidents.
- 3) Copies of any presentations (including PowerPoint presentations) by Commission staff and any copies of notes or meeting logs to you, the Office of the Chairman, or any other Commissioners' offices, concerning the investigation of residential elevator entrapment incidents.
- 4) Copies of all correspondence, including e-mails, phone logs, and meeting logs, of any communications between employees of residential elevator manufacturers and you, the Office of the Chairman, or Commission staff from February 17, 2017, to the present.
- 5) Copies of any proposed Corrective Actions Plans or other voluntary recall efforts negotiated by Commission staff concerning products made by residential elevator manufacturers from February 17, 2017, to the present.
- 6) Copies of any proposed civil penalty actions against residential elevator manufacturers from February 9, 2017, to the present.
- 7) A list of all meeting requests made from victims of residential elevator entrapment incidents to the Chairman's office, other Commissioners offices, Office of Compliance staff, or other Commission staff offices from February 17, 2017, to the present. Please also provide a copy of the office's response or responses to the meeting request.

Please provide the requested documents as soon as possible, and in no event later than July 19, 2019. Thank you in advance for your assistance with this request.

**All Reported Incidents on BOB Jogging Strollers**  
**Date of Incident : Dec 1, 2011 -**  
**- Apr 15, 2019**

Incident #	Incident Date	Received date	Source	Document Number	City	State	Victim age/sex	Severity of injury	Narrative
1	1/16/2012	7/11/2016	Section 15 (b)		BOCA RATON	FL	N/A	Incident, No Injury	Consumer states that front wheel of the jogging stroller fell off in park. Consumer cant' put wheel back on fork. No injuries.
2	1/17/2012	7/11/2016	Section 15 (b)		CHICAGO	IL	N/A	Incident, No Injury	Consumer states wheel of the jogging stroller fell off; screw w/ bolt, no quick release on the product.
3	1/26/2012	7/11/2016	Section 15 (b)		PHILADELPHIA	PA	N/A	Incident, No Injury	Consumer states front wheel the jogging stroller fell off ; quick release missing.
4	1/31/2012	7/11/2016	Section 15 (b)		GURNEE	IL	N/A	Incident, No Injury	Consumer states: front wheel of the jogging stroller fell off twice.
5	2/2/2012	3/21/2013	Section 15 (b)		CHANDLER	AZ	18 MOF	Level of care not known	This is my first review and after reading the 4.5 star reviews we bought this stroller a few months back i'm already wondering if there will be a recall. Aside from the fact that my daughter at 18 months is too long for this stroller. Yesterday my daughter caught her fingers in the sun shade, on the side by the hinge. I've never heard her scream like that before. I have photos of her little fingers bent and bloody. The people at bobgear don't even have an email to be reached at!!! now i own a \$400 stroller that my daughter won't sit in. Am i the only one this has happened to??? also we have had to replace the undercarriage because it tore the first week and front wheel went flat (a \$13 fix). This stroller has maybe 10 miles on it... I'm seriously disappointed in the bob. This stroller has ton of hype for so many issues.□
6	2/23/2012	7/11/2016	Section 15 (b)		TUKWILA	WA	N/A	No Incident, No Injury	Retailer states that rear wheel fell off the jogging stroller.
7	4/16/2012	7/11/2016	Section 15 (b)		CARLSBAD	CA	N/A	Incident, No Injury	Consumer states that front wheel fell off the jogging stroller, while child in stroller. No injuries.
8	4/23/2012	7/11/2016	Section 15 (b)		BIRMINGHAM	AL	N/A	Incident, No Injury	Consumer states that front wheel fell off the jogging stroller.
9	5/14/2012	7/11/2016	Section 15 (b)		New YORK	NY	UnkM Unk	Seen by Medical Professional	Consumer states the jogging stroller callapsed while running on flat sidewalk and two children fell out. Both children have bruised and fat lips. One year old son has a concussion from the accident. Medical attention was sought.
10	7/18/2012	4/27/2017	Section 15 (b)		PEABODY	MA	Unk	Level of care not known	Consumer was on street out running near cemetery. Was running and front wheel came off stroller, causing it to flip over. Child got bruise on face and qr was not checked prior to running.

11	9/20/2012	9/25/2012	Consumer			Fayetteville	NC	2 YOM	First Aid Received by Non-Medical Professional	On september 20, 2012 a two year old boy received a contusion on his forehead and a scraped nose when the quick release fastener securing the front wheel to the jogging stroller he was strapped into became disconnected which caused the front fork to impact the ground and flip the stroller.
11	9/20/2012	4/27/2017	Section 15 (b)			FAVETTEVILLE	NC	2 YO	No First Aid or Medical Attention Received	Consumer was running with 2 yo child in stroller in the neighborhood, front wheel came off, stroller flipped over and child received bruises on face and nose. Child did not seek medical attention, but is okay.
12	10/5/2012	7/1/2016	Section 15 (b)			CHICAGO	IL	N/A	Incident, No Injury	<input type="checkbox"/> consumer states front wheel fell off while running jogging stroller. Fork jack, knife & handle bar hit consumer in neck. No injuries. Consumer did not seek medical treatment. <input type="checkbox"/>
13	10/17/2012	7/1/2016	Section 15 (b)			RANCHO CUCAMONGA	CA	N/A	Incident, No Injury	Consumer states front wheel fell off the jogging stroller.
14	10/21/2012	10/22/2012	Consumer			Marlton	NJ	33 YOM	Emergency Department Treatment Received	A 33 year old male had his three year old and one year old children in a double running stroller when the front wheel came off and the forks hit the pavement causing the stroller to flip over and land on top of the children. They both had bruises and abrasions and was evaluated by medical personnel. The complainant said that the tension nut had come off the quick release for the front wheel. The broken parts have been replaced by the manufacturer.
14	10/21/2012	4/27/2017	Section 15 (b)			MARLTON	NJ	Unk 3 YO	Emergency Department Treatment Received	Consumer was running with children front of came loose wheel fell off the stroller. The stroller flipped and both children hit the pavement. Both children were sent to the er but only obtained minor cuts and bruises.
14	10/21/2012	4/27/2017	Section 15 (b)			Marlton	NJ	Unk 3 YO	Emergency Department Treatment Received	Consumer was running with children. Front of came loose wheel fell off the stroller, stroller flipped and both children hit the pavement. Both children were sent to the er but only obtained minor cuts and bruises.
15	12/13/2013	7/1/2016	Section 15 (b)			West Village	CO	1 YOF	First Aid Received by Non-Medical Professional	A one-year-old female fell through the five point harness of a double occupant jogging stroller. The victim fell forward out of the stroller onto the pavement and hit her head. There was a small contusion to her head and no medical attention was sought. The harness was observed to have frayed and separated.
16	1/2/2013	7/1/2016	Section 15 (b)			VAN NUYS	CA	N/A	Incident, No Injury	Consumer states front wheel fell off the jogging stroller.
17	1/14/2013	7/1/2016	Section 15 (b)			SOUTH PORTLAND	ME	N/A	Incident, No Injury	Consumer states that fork fell off the jogging stroller.

18	3/20/2013	4/27/2017	Section 15 (b)			COLUMBUS	GA	N/A	Incident, No Injury	The stroller collapsed on child while mother was getting other child out of car, front wheel came off stroller and rolled away.
19	3/20/2013	7/1/2016	Section 15 (b)			WEST LONG BRANCH	NJ	4 YOM	Seen by Medical Professional	Consumer states child harness in the stroller and the front wheel fell off while strolling on boardwalk, stroller went forward and the 4 year old child hit his head on the sidewalk, had to require stitches.
20	5/18/2013	5/20/2013	CPSC Staff			NEW MILFORD	CT	1 YOM 3 YOF	First Aid Received by Non-Medical Professional	A one year-old male sustained a bloody nose and scrapes to his face and a three year-old female sustained scrapes to her face when the foot-activated parking brake of a double stroller reportedly failed while on a flat, paved walking path; causing the stroller to roll down an embankment and into a river with the two children secured in the seats. A babysitter who was caring for the children at a local park stated she set the parking brake less than one minute prior to the incident in order to assist a third child with an unrelated bicycle. Police and ambulance personnel responded; however medical treatment was declined and no official reports were generated regarding the incident.
21	5/22/2013	7/1/2016	Section 15 (b)			BERWYN	PA	N/A	Incident, No Injury	Consumer states that was jogging and the front wheel fell off the jogging stroller, child not hurt.
22	5/28/2013	7/1/2016	Section 15 (b)			Leewood	KS	Unk 1 YO	First Aid Received by Non-Medical Professional	Consumer states front wheel came off the jogging stroller while jogging, came off stroller, flipped and one year old fell & face is scratched.
23	5/31/2013	7/1/2016	Section 15 (b)			MEDFORD	MA	2 YOM	First Aid Received by Non-Medical Professional	Consumer states 2 year old child hit his head when wheel fell off the jogging stroller. He got a bruise. <input type="checkbox"/> child did not seek medical treatment.
24	5/31/2013	7/1/2016	Section 15 (b)					N/A	Incident, No Injury	Consumer states that front and rear wheel fell off the jogging stroller.
25	6/10/2013	7/1/2016	Section 15 (b)					N/A	Incident, No Injury	Consumer states the front wheel fell off frame from a jogging stroller.

26	6/16/2013	6/24/2013	Consumer		Surland	CA	54 YOF 13 MOF	Emergency Department Treatment Received	<p>I was walking my 13 month old baby in my bob revolution stroller (model number st1024, manufacture date 01-22-2013). <input type="checkbox"/></p> <p>I stepped slightly wrong on my right foot and lightly gripped the stroller handle for balance. Suddenly, and without warning, the stroller accelerated downward. I landed very hard on my right knee and right ankle. The stroller completely flipped over and my baby was hanging upside down. There is no way to prevent this because of the design of the stroller. Even if I had let the stroller go (which would have been dangerous for my baby) there is a wrist band that you are required to wear which pulls the stroller over. <input type="checkbox"/></p> <p>I went to the emergency room and got x-rays, pain medication, an [redacted] bandage, a boot and crutches. One week later (today), I am still in pain. My right knee cap also hurts and my right knee is bruised and scraped. In addition, my left knee and left hand are scraped. I have an appointment with an orthopedist tomorrow. <input type="checkbox"/></p> <p>In addition to the physical injuries, it w</p>
27	6/24/2013	8/13/2013	Section 15 (b)	Y1384395A	LA CRESCENTA	CA	Unkf	Level of care not known	<p>Customer had ordered stroller and the stroller flipped over with her child in it causing accident and customer hurting herself, customer filed complaint with manufacturer and they had asked for customer to send back to them</p>

28	9/1/2013	11/13/2014	Consumer		Anaheim	CA	N/A	Incident, No Injury	<p>The caller stated that black nylon footwell fabric stretches, and tears very quickly (few days to few weeks after initial use). <input type="checkbox"/></p> <p>the caller stated that the seams are splitting or are not sewn well so they come apart. <input type="checkbox"/></p> <p>the caller stated that there is a metal bar underneath the footwell that can injure a child if the fabric tears. <input type="checkbox"/></p> <p>the caller has noticed this issue in the stroller since september 2013. <input type="checkbox"/></p> <p>the caller stated that she has contacted the man in regards to this issue in dec 2013. They initially informed her that they will provide replacement fabric for all of the strollers. The caller stated that the replacement fabrics were very hard to install. The caller stated that one of the replacement fabric is showing the tearing issue. <input type="checkbox"/></p> <p>the caller contacted the man again in 2014 and they started sending her whole new replacement strollers. The caller had the issue with the replacement strollers as well. <input type="checkbox"/></p> <p>the caller started writing reviews on the strollers and was contacted by her representative</p>
29	9/5/2013	7/1/2016	Section 15 (b)		Kirkland	WA	Unkf	First Aid Received by Non-Medical Professional	<p>Consumer states that she was running about a 1/2 mile from home when the front wheel completely fell off the stroller. Consumer stated that the front wheel was locked. The stroller flipped over and she went over the stroller, she sustained bruises, which she will email photos. Replacing the stroller for the same. Consumer also stated that her 4 year old was harnessed in stroller and did not get hurt at all. Consumer also stated that she took the stroller to a store (where purchased) and a technician told her that there was no way the wheel would fall off if the quick release was securely tight on the wheel.</p>
30	9/17/2013	7/1/2016	Section 15 (b)		South San Francisco	CA	Unkm	No First Aid or Medical Attention Received	<p>The consumer was running in the neighborhood and the front wheel came off stroller. Consumer ran into the stroller when it flipped. The 9 mo child was in the stroller, did not get hurt. Consumer hurt his knee and hand. He did not seek medical treatment.</p>
31	10/3/2013	7/1/2016	Section 15 (b)		DUBLIN	CA	N/A	Incident, No Injury	<p>Consumer stated that front wheel of came off jogging stroller and it damaged.</p>

32	10/9/2013	7/11/2016	Section 15 (b)			Arlington	OH	Unk 2 YO and 6 MO UnkF	First Aid Received by Non-Medical Professional	Female was running with two children. 2 yo child was not harnessed in seat & 6 mo child was in harness. Stroller was in swivel mode causing it to shake, front wheel came off & 2 yo child flew forward. Child got minor cuts & bruising, didn't seek medical attention.
33	10/17/2013	10/22/2018	Section 15 (b)			JBER	AK	7 MOM	Emergency Department Treatment Received	A 7 mom was harnessed into stroller seat, mom applied brake. Stroller was on a hill mom thought brake was on she turned her back and stroller rolled down the hill and fell over. The child was taken to the er and treated for minor cuts and bruises. Upon investigation the brake doesn't appear to be engaging on the right side of the stroller.
34	12/3/2013	7/11/2016	Section 15 (b)			Milford Township	MI	N/A	Incident, No Injury	Consumer stated that axle broken & wheel came off of jogging stroller.
35	12/4/2013	7/11/2016	Section 15 (b)			COLORADO SPRINGS	CO	N/A	Incident, No Injury	Consumer stated that qt broke & wheel fell off of jogging stroller.
36	2/11/2014	2/12/2014	Consumer			Walnut creek	CA	17 MOF	First Aid Received by Non-Medical Professional	A 17 month old female sustained skin loss of her left index finger after her finger was pinched in the folding section of the retractable canopy of a baby stroller. The mother provided the victim with first aid, but she did not seek further medical treatment.
37	2/19/2014	10/22/2018	Section 15 (b)			LAWRENCEVILLE	GA	Unk	No First Aid or Medical Attention Received	Consumer was at mall and brake didn't engage, stroller went rolling with child in stroller. Stroller tipped over with child in stroller seat. Brake bar wouldn't go down. No medical attention required. Small scratch.
38	3/26/2014	7/11/2016	Section 15 (b)			Arlington	TX	N/A	Incident, No Injury	Consumer stated that baby stroller fork was damaged while consumer was running with wheel in swivel.
39	4/15/2014	7/11/2016	Section 15 (b)			North College Hill	OH	N/A	Incident, No Injury	Consumer stated wheel came off baby stroller, and unit fell over, child wasn't hurt.
40	4/30/2014	7/11/2016	Section 15 (b)			Cerritos	CA	N/A	Incident, No Injury	Consumer stated that baby stroller wheel pulls off.
41	5/6/2014	7/11/2016	Section 15 (b)			Belford	NJ	2 YOM UnkF	Emergency Department Treatment Received	While consumer was running with son in stroller, front tire flew off of stroller. Stroller frame flipped forward & her son flew forward striking head on pavement. He hit center of his forehead, which required stitches.
42	5/19/2014	7/11/2016	Section 15 (b)			Fairfield	CT	N/A	Incident, No Injury	Consumer stated that front wheel of baby stroller fell off.

[illegible]

56	8/13/2014	7/11/2016	Section 15 (b)			DENVER	CO	N/A	Incident, No Injury	Consumer states she was running with jogging stroller in swivel position. She has to run with it in the locked position. Front wheel detachment and instability.
57	8/21/2014	7/11/2016	Section 15 (b)			West Long Branch	NJ	3 YOF	Seen by Medical Professional	While jogging on the boardwalk, right wheel fell off stroller. Customer had checked wheel 2 days prior & it was fine. When right wheel fell off, the stroller fell to the right. Her 3 yo daughter's right hand hit the ground and was cut. She received four stitches in hands.
58	8/24/2014	7/11/2016	Section 15 (b)			Fullerton	CA	Unkf 2 MOF	Seen by Medical Professional	The front wheel of the stroller had completely flown off. Customer's 2 months old daughter was in the stroller strapped in a car seat. Customer's daughter appeared okay. However, the customer was hurt. Both the customer and her daughter were transported to urgent care. The daughter is fine and the customer was cut and bruised up.
59	9/8/2014	7/11/2016	Section 15 (b)			Portsmouth	NH	Unkf 4 YOF	No First Aid or Medical Attention Received	Consumer said while on morning run, the front wheel of stroller flew off the fork. The area where she was running was smooth pavement. She checked the qt, but when asked about the pain print pressure, she said she was not aware of it. She only made it tight enough to shut without a print. Her daughter flew forward but was caught by harness and not injured. Mother suffered minor scrapes and bruises.
60	9/9/2014	7/11/2016	Section 15 (b)			COLWICH	KS	N/A	Incident, No Injury	Consumer states wheel came off (stroller) and got ran over. They did not know how to tighten the qt.
61	9/25/2014	10/29/2014	Consumer			CINCINNATI	OH	N/A	Incident, No Injury	A one-month-old child was riding in a car seat which was attached to a jogging stroller when suddenly the front wheel detached causing the stroller to flip end over end at least twice. The child was examined and believed to have sustained no injury.
62	9/16/2014	7/11/2016	Section 15 (b)			Mission Viejo	CA	N/A	Incident, No Injury	Consumer states front wheel came off and bent the qt. Scared to use the stroller.
63	9/17/2014	7/11/2016	Section 15 (b)			PORTLAND	OR	Unkm 6 YOM	First Aid Received by Non-Medical Professional	An adult male and his six year old son were injured when the jogging stroller he was using collapsed when he hit a bump in the path where he was using the stroller to jog with his son who was in the seat of the stroller but was not wearing a helmet. The adult male sustained abrasions to the shins of both of his lower legs and his six year old son sustained abrasions to his chin.
64	9/26/2014	7/11/2016	Section 15 (b)			New York	NY	N/A	Incident, No Injury	Consumer was running in swivel mode and the front wheel on (stroller) fell off. No one was hurt. Explained to consumer that the wheels must be in a lock mode to run or jog. She stated then the wheel would not turn.

65	10/22/2014	11/3/2014	Consumer						<p>Incident, No Injury</p> <p>This caller is reporting that around october 22nd, 2014 she ordered a bob stroller from craig's list that was listed in good condition. <input type="checkbox"/> as she has examined the stroller she has found that the stroller is missing a bolt on the front where the two sunshades connect. <input type="checkbox"/> the strap is weather worn, she strapped her two year old in and the strap immediately broke. <input type="checkbox"/> the safety harness has been sewn back in using matching thread but obviously by hand. <input type="checkbox"/> she has been provided with contact numbers for the ftc and for ca consumer protection. <input type="checkbox"/> she is reporting this transaction to the cpsc after being informed that this stroller is also recalled with cpsc release# 11-143. <input type="checkbox"/> the drawstring is still in the stroller and there is no remedy applied. <input type="checkbox"/></p> <p><input type="checkbox"/> there have been no injuries, caller has not been able to use the stroller. <input type="checkbox"/> she will contact the consumer protection offices but is asking if cpsc can assist her with the fact that it was sold to her recalled by mnr. [redacted] (last name unknown), [redacted]</p>
66	10/23/2014	11/3/2014	Section 15 (b)						<p>Level of care not known</p> <p>For the cost of these things, i think the quality could be better. Everyone has one now and it's turned into an image statement. The stroller has worked well for us so far, but not sure i would buy one again. The pay extra for cup holder attachment is a piece of crap and not well thought out. Plus i think it should have came with the stroller in the first place. The top sun shade is a finger pincher so be very careful where you child's fingers are when you pull back the shade. It took the skin off. Not sure why the design allow for this. It squeaks too which drives me nuts. The connection points allow for rubbing and debris, but are not serviceable. It was fine until we started using the stroller for trail hiking where dirt and water can get in the joints. Took forever to pressure wash it out, dry it and force graphite between the joints to stop the squeaks... Having to repeat this after every hike is a bit annoying. They should make it come apart for freaks like me or make the connections more sec</p>

67	11/10/2014	4/27/2017	Section 15 (b)			Charlotte	NC	Unk	Seen by Medical Professional	Consumer was running with 25 mo son, the stroller flipped and rolled with son inside causing him tremendous fear associated with running strollers. Consumer tripped, catapulted into the air and came down in an extremely hard manner on the outstretched right arm. Consumer went to an orthopedic and was dx with a high grade rotator cuff tear and labrum tear. Consumer underwent right shoulder surgery. Consumer missed two weeks of work due to surgery and initial recovery.
68	11/18/2014	11/24/2014	Consumer					N/A	No Incident, No Injury	I am writing you about an issue i encountered with a craigslist seller/local business owner. I made arrangements to meet this man at a gate gas station to purchase a bob revolution stroller for \$275. I bought the stroller, got home and it was not what my wife wanted. I politely asked (less than an hour later) for a refund and was denied. No surprise there, the seller told me to resell it on craigslist. Fully realizing i had no other choice i decided to list it back on craigslist that night. My wife began looking up info on the stroller to add to the new listing, upon which she found that the stroller was recalled. <a href="http://www.Cpsc.Gov/en/recalls/2011/jogging-strollers-recalled-by-bob-trailers-due-to-strangulation-hazard/">http://www.Cpsc.Gov/en/recalls/2011/jogging-strollers-recalled-by-bob-trailers-due-to-strangulation-hazard/</a> since it is against craigslist terms of service and illegal to resell a recalled product i am stuck with the stroller. I emailed the seller with this information to which he has not replied. Due to the fact that he sold me a stroller, illegally, is there any recourse in this situation? i have

											12/9/2014: the consumer's 3 year old son was in the stroller and he got his left arm entangled in the canopy's drawing. The son had been in the stroller for approximately 20 minutes. The son could not free himself, so the consumer untangled his arm. The son had a minor bruise to his arm and the consumer applied [redacted] to ease the pain. <input type="checkbox"/>
69	12/9/2014	12/19/2014	Consumer			Portland	OR	3 YOM	First Aid Received by Non-Medical Professional	<input type="checkbox"/> 12/18/2014: the consumer called the mfr. Listed in recall 12-006 and told their rep. About his incident. The rep. (name unknown) told the consumer that the stroller was listed in recall 12-006 and read a list of retailers that sold these strollers. The consumer said that the rep. Did not tell him to take the stroller to a specific retailer... <input type="checkbox"/>	
										<input type="checkbox"/> 12/19/2014: the consumer attempted to take his stroller to wal-mart to exchange it for something comparable, but made by a different firm. The wal-mart rep. Would not take the stroller back. The consumer said that he stayed at wal-mart for 2 hours, but the employees would not allow him to call their corporate office a	
70	12/16/2014	7/11/2016	Section 15 (b)			ATHENS	GA	N/A	Incident, No Injury	Consumer states front wheel on stroller's ame off quick release bent.	
71	12/16/2014	7/11/2016	Section 15 (b)			North Augusta	SC	36 YOF 1 YOF	Emergency Department Treatment Received	A 36 year old mother was running behind a jogging stroller with her one year old daughter inside of the stroller when a sweet gumball tree bud got caught in the stroller's front wheel. The gumball tree bud jammed the stroller's front wheel causing the wheel to not move. The mother's forward pushing motion caused the stroller to topple forward and the child inside of the stroller hit the ground face first. The child sustained minor injuries to the top of her nose. There are no permanent injuries.	
72	1/19/2015	7/11/2016	Section 15 (b)			WHITTIER	CA	N/A	Incident, No Injury	Consumer states front wheel on (stroller) came off.

76	3/20/2015	7/11/2016	Section 15 (b)					RIVER HEIGHTS	UT	2 YOF 4 YOM	First Aid Received by Non-Medical Professional	A 4-year-old and a 2-year-old female were injured when the front wheel of their side-by-side jogging stroller fell off, ejecting both of them from the stroller to the residential sidewalk on which they were traveling. The 4-year-old sustained knee abrasions and the 2-year-old female sustained lacerations to her mouth. Both children were treated at the scene and no further medical attention was required.
76	3/27/2015	7/11/2016	Section 15 (b)					RIVER HEIGHTS	UT	2 YOF 4 YOF 11 YOF	Level of care not known	Consumer's 11 year old female neighbor was pushing the stroller. Later he amended to a jog. Front wheel was unlocked. She hit a crack in the cement, the front wheel broke off. 4 year old ( was not harnessed) and 2 year old female ( was strapped in) where in the stroller. The 4 year old fell out onto cement and scrapped knee. The 2 year old fell forward, hit face and chin on cement. Lower lip was pushed through her top teeth.
77	4/14/2015	7/11/2016	Section 15 (b)					Cincinnati	OH	Unkm Unk 9 MO Unk 4 YO	No First Aid or Medical Attention Received	Customer's husband was running with two children in revolution se double stroller. 4 year old was not harnesses and 9 mo was harnessed. Front wheel was not locked. After 40 minutes, front wheel came off, handle bar toppled over. Husband's legs ran into brake bar, bruised and swollen. 9 mo remained in stroller, unhurt. 4 yo jumped out, unhurt. Husband did not seek medical attention.
78	4/20/2015	7/11/2016	Section 15 (b)					Nokesville	VA	33 YOF 3 YOF	Seen by Medical Professional	A 33-year-old woman and her 3-year-old daughter were injured when a jogging stroller flipped over when its front wheel detached. The woman's 3-year-old daughter was sitting on the front of the stroller during the incident. The consumer's 17-month-old daughter was harnessed inside the stroller and was not injured.
79	4/26/2015	7/11/2016	Section 15 (b)					Acworth	GA	17 MOF Unkm	Hospital Admission	Consumer was jogging downhill on trail in forest when front tire came off & stroller did three flips. 17 mof fell off. He & girl went over side of trail down "ravine" 17 mof broke right little finger & sustained scratches. She was taken to hospital. He cut arms & knees.
80	5/11/2015	7/11/2016	Section 15 (b)					WALLISTON BEACH	MA	2 YOM Unkf	No First Aid or Medical Attention Received	While a 2-year-old male secured inside a jogging stroller was being pushed by the his mother on a dry paved sidewalk, suddenly the front wheel detached causing the stroller to tumble forward. The mother simultaneously fell to the ground and the stroller came to rest upside down with the child strapped inside. The child sustained a contusion to his forehead, and the mother sustained abrasions to both knees and elbows.
81	5/19/2015	7/11/2016	Section 15 (b)					CORONA DEL MAR	CA	N/A	Incident, No Injury	Consumer states ( stroller's) front tire fell off while running.

82	6/5/2015	7/1/2016	Section 15 (b)		Nine Mile Falls	WA	MA	Incident, No Injury	Consumer states, canopy does not stay out on (stroller), and wheel is damaged and came off.
83	6/7/2015	6/8/2015	Consumer		Hingham	MA	N/A	Incident, No Injury	<p>On 06/07/15 the consumer put his daughter in the stroller and went for a walk. When the consumer returned home and went to take his daughter out of the stroller he noticed that the button on the safety strap was missing. The consumer states the button is pressed to release the locking mechanism on the harness strap. The consumer found the button underneath his daughter, on the stroller seat. <input type="checkbox"/></p> <p>On 06/07/15 the consumer emailed the firm expressing his safety concerns. The consumer has not heard from the firm as of today, 06/08/15. <input type="checkbox"/></p> <p>there are not prior incidents. <input type="checkbox"/></p> <p>the consumer's daughter is 10 months old and weighs 26 pounds (approximately). <input type="checkbox"/></p> <p>the consumer believes the stroller poses a safety hazard and if his daughter would have found the button she would have put it in her mouth and possibly choked on it.</p>
83	6/7/2015	6/8/2015	Consumer		Hingham	MA	N/A	Incident, No Injury	<p><input type="checkbox"/> whom this may concern-<input type="checkbox"/></p> <p>my wife and i bought the briax bob revolution from rei about 7 months ago for our daughter who is now 9 months old. When i went to take her out of it today after a walk i found that the button that releases the two side straps was missing. After looking more closely i found that she was sitting on it. Please see the attached photo. <input type="checkbox"/></p> <p>i don't have to tell you how serious a situation this could have been if she had found this small piece of plastic during our walk and swallowed it. <input type="checkbox"/></p> <p>we hadn't noticed anything wrong with it prior to today. The only thing that occurred that was out of the norm was that i mistakenly had the center clasp that this button is in reversed when i first put her in the stroller and tried to clip her in. i noticed that the clips didn't seem right and realized what i did so i pulled them out and reversed the center clasp so it was in the correct position and then clipped her in. Not sure if this caused the button to fall out but if so it could easily happen</p>

Mid run my front wheel fell off my stroller the metal screw is bent up at a 90° angle. This is my 2nd incident with this stroller. I'm hoping there is more that can do then say just have it look at.
145	6/12/2016	7/1/2016	Section 15 (b)			PITTSFIELD	MA	36 YOF	No First Aid or Medical Attention Received	A 36-year-old mother was injured when the front wheel detached on her jogging stroller while she was participating in a road race with her eight-month-old son. Her son, who was not injured, was secured in a compatible infant car seat on top of the stroller. The victim, who suffered bruises to her shin and upper thigh on her left leg, did not require medical treatment and has since made a full recovery.
146	6/22/2016	3/9/2017	Section 15 (b)			BILLINGS	MT	N/A	Incident, No Injury	Consumer states -stroller's front wheel came off while walking. The axle is bent in the wheel. Did not check before use.
147	6/24/2016	3/9/2017	Section 15 (b)			GENEVA	IL	N/A	Incident, No Injury	Consumer states running w wheel in swivel no injury. Did advise consumer to lock front wheel when running. [stroller]
148	7/1/2016	2/2/2018	Online News Sources			Machipongo	VA	27 YOF	First Aid Received by Non-Medical Professional	A 27 year-old woman was pushing her infant in a jogging stroller, when the three wheels suddenly popped off, causing the stroller to flip over, landing upside down, with the infant facing the pavement. The infant was not injured as a piece of the stroller created an approximate 2-inch gap between his face and the sidewalk, however the mother suffered a 6-inch laceration to her lower left leg. No medical treatment was sought.
149	7/6/2016	3/9/2017	Section 15 (b)			CARY	NC	N/A	Incident, No Injury	Revolution flex, black/black, bob (obs). Front wheel detachments and instability. [stroller]

173	11/11/2016	3/9/2017	Section 15 (b)			FULTON	MD	31 YOM	First Aid Received by Non-Medical Professional	The front wheel of a jogging stroller detached while a 31-year-old male was running on an asphalt path with his 9-month-old son. The man sustained minor injuries to his legs when he grabbed the stroller to prevent it from tipping over. The 9-month-old male was not injured.
174	11/12/2016	8/11/2017	Section 15 (b)			SAINT AUGUSTINE	FL	2 YOF 4 YOF	First Aid Received by Non-Medical Professional	While running during first mile, 6 to 8 minutes in race, front wheel detached, fork went forward & stroller flipped over onto 2 yof & 4 yof causing scrapes. Stroller front axle & front fork were bent.
175	11/15/2016	3/9/2017	Section 15 (b)			DECLLO	ID	6 MOM Unkf	Seen by Medical Professional	A six-month-old male and his mother were injured when the front wheel on the jogging stroller that they were using on a paved road disengaged from the unit, causing the forks of the stroller to dig into the pavement. The stroller flipped over and the restrained child hit his face on the ground. The mother landed on top of the stroller and sustained some bruising, some scrapes, and some body pain. The mother administered first aid and the child and mother have subsequently received treatment at a chiropractor.
176	11/16/2016	3/9/2017	Section 15 (b)			GURLEY	AL	21 MOF 32 YOF	First Aid Received by Non-Medical Professional	On november 16, 2016, a woman was jogging with her jogging stroller when the front wheel detached causing her to fall over the stroller. Her daughter sustained a bruise to her forehead, and the woman sustained a bruise to her hip and shin. They did not seek medical treatment.
177	11/17/2016	3/9/2017	Section 15 (b)			SALT LAKE CITY	UT	Unkf	Seen by Medical Professional	A mother was injured when the front wheel on a jogging stroller that she was using disengaged from the unit, causing the forks of the stroller to dig into the road pavement. Her child was in a car seat that was attached to the stroller. The car seat did not detach during the incident and the child was unharmed. The mother flipped over the top and off to the side where she hit her knee on the ground. The mother's husband (physician) administered first aid and the wound did not require any additional medical care.
178	11/21/2016	3/9/2017	Section 15 (b)			TROY	NY	N/A	Incident, No Injury	Consumer stated that front wheel came off of stroller but the gr is bent
179	11/28/2016	3/9/2017	Section 15 (b)			South Haven	NY	N/A	Incident, No Injury	Consumer stated that stroller front wheel came off and bent front gr.

180	12/12/2016	3/9/2017	Section 15 (b)				Chicago	IL	N/A	Incident, No Injury	The male respondent states he was running perhaps 3-miles per hour on a sidewalk with his 15-month old daughter (child) seated inside a 1-seat stroller. The stroller hit a dip or crack in the sidewalk when the front wheel snapped off the frame or fork. The stroller flipped forward and the child struck her forehead on the pavement sustaining a bruise. The respondent tripped over the stroller and also fell to the pavement sustaining scrapes to his left elbow. It was wintertime and the child was wearing heavy clothing and a hat which the respondent states provided a couple layers of protection. The respondent states this experience was "user error more than anything else" because he did not lock the front wheel in position before his run.
181	12/12/2016	3/9/2017	Section 15 (b)				Eau Claire	WI	N/A	Incident, No Injury	Consumer never locked front wheel of stroller when running. Consumer stated that wheel detached & fell down hill.
182	12/14/2016	3/9/2017	Section 15 (b)				Chattanooga	TN	N/A	Incident, No Injury	Consumer stated that wheel of stroller detached. Consumer runs with wheels unlocked and checks if and wheel connections monthly.
183	12/28/2016	3/9/2017	Section 15 (b)				KING OF PRUSSIA	PA	N/A	Incident, No Injury	Consumer stated that front [stroller] or bent
184	12/28/2016	3/9/2017	Section 15 (b)				VIRGINIA BEACH	VA	N/A	Incident, No Injury	Customer stated as she was using stroller, the front wheel fell off and the quick release was bent. <input type="checkbox"/>
185	1/8/2017	8/1/2017	Section 15 (b)				SAN DIEGO	CA	41 YOF	Level of care not known	The consumer was using inline skates as she pushed a stroller. The strollers front wheel began to wobble and the consumer lost her balance causing her to fall and break her wrist. There was no wheel detachment. No fire or ems services were involved.
186	1/9/2017	3/9/2017	Section 15 (b)				HAMILTON	NJ	N/A	Incident, No Injury	Customer stated that the front wheel of stroller fell off.
187	1/10/2017	3/9/2017	Section 15 (b)				Brooklyn	NY	N/A	Incident, No Injury	Consumer stated that stroller front wheel popped off.
188	1/13/2017	3/9/2017	Section 15 (b)				Pensacola	FL	N/A	Incident, No Injury	Consumer stated that stroller or bent while running. He stated that leg hurt, but no injury. Child was ok. Consumer starting running with stroller wheel locked then started to vibrate then bolt bent resulting in teat end going forward.
189	1/20/2017	3/9/2017	Section 15 (b)				SAN DIEGO	CA	N/A	Incident, No Injury	Customer stated the stroller front wheel fell off and caused an accident including canopy damaged and scratches to frame.
190	2/1/2017	8/1/2017	Section 15 (b)						N/A	Incident, No Injury	Consumer states: babysitter pushing stroller when front wheel detached. States was not running and checked connections.
191	2/7/2017	8/1/2017	Section 15 (b)						N/A	Incident, No Injury	Consumer states while running stroller wheel unlocked and front wheel came off. No injury.

205	5/20/2017	8/11/2017	Section 15 (b)	[REDACTED]			PORTSMOUTH	NH	Unkf Unkm Unkm	First Aid Received by Non-Medical Professional	While running, the stroller shuddered & front wheel detached & consumer's husband went forward over top of stroller & suffered a knee scrap. His daughter made contact with pavement & their son's injuries were of impact with snack tray. Did not seek medical attention.
206	5/23/2017	8/11/2017	Section 15 (b)						N/A	Incident, No Injury	Consumer stated that stroller front wheel detached.
207	6/2/2017	8/11/2017	Section 15 (b)				SEATTLE	WA	Unkm	Level of care not known	Consumer states: while walking front wheel detached, stroller rolled to side & detached. Father fell to the right towards mother as he was trying to stop stroller, causing bruising and cuts to his leg. When stroller fell to the side, 5 mo child did not make contact with ground.
208	6/2/2017	8/11/2017	Section 15 (b)						N/A	Incident, No Injury	Consumer stated that front wheel detached, causing stroller frame to twist and bend.
209	6/8/2017	8/11/2017	Section 15 (b)						N/A	Incident, No Injury	Consumer stated front wheel came off stroller while they were using it.
210	6/22/2017	8/11/2017	Section 15 (b)						N/A	Incident, No Injury	Consumer stated qr came off, consumer was running with front wheel of stroller in swivel mode, no mention of injury.
211	7/1/2/2017	1/10/2018	Section 15 (b)				Kenai	AK	41 YOM	Level of care not known	A 41 year-old male reported the front wheel detached from his dualie jogging stroller during a downhill portion of a race, causing the consumer to fall to the dirt ground. The consumer's 9 month-old daughter and 4 year-old son were in the stroller when the incident occurred, but were not injured. The consumer sustained abrasions to his right knee and shin as well as abrasions to his left shoulder as a result of the incident.
212	7/18/2017	12/14/2017	Section 15 (b)				Grand Rapids	MI	N/A	Incident, No Injury	The foot/parking brake failed to lock securely on 20 different occasions while a 4 yom and 1.5 yof child were in a double stroller. The mother estimated that sometimes the double stroller moved forward just 18-26 while other times it moved forward as much as 1 foot. She explained that sometimes the locking bar moved and then caught in one of the locking disk grooves to stop itself. Other times, the mother caught the stroller with her hand. She explained that after she identified this as a safety concern, she stayed close to the stroller to prevent injury.
213	7/17/2017	1/10/2018	Section 15 (b)				Phoenix	MD	N/A	Incident, No Injury	A 32 year old female was jogging on a paved street with her daughter harnessed in a stroller. When she turned a corner, the front wheel disengaged from the forks of the stroller causing the stroller to stop abruptly. The victim toppled over the stroller suffering contusions and abrasions to both her lower legs. Her 17 month old daughter was unharmed. Victim did not seek medical attention.

214	7/26/2017	11/27/2017	Section 15 (b)	[REDACTED]				NORTH BEND	WA	2 YOM	Emergency Department Treatment Received	The 34 year old complainant placed her 2 year old son inside of a jogging stroller and then wheeled the stroller next to a relatively steep grade adjacent to her driveway. The complainant put the seatbelt on her son, and then applied the parking brake on the stroller. The complainant briefly stepped away from the stroller to get her other child, and upon returning she observed the stroller rolling down the grade with her son still inside. The stroller traveled 15 - 20 feet before it swerved into a grassy area, rolling over onto its top. The complainant's son sustained minor abrasions and bruising to his face and head as a result of the incident.
215	8/31/2017	12/14/2017	Section 15 (b)					EIELSON AFB	AK	N/A	Incident, No Injury	A 35 year-old female consumer reported the braking system on her side-by-side dual stroller was not functioning properly. The consumer reported in order for the brake to lock the wheels in place she had to push the stroller forward then backward. No injuries were reported.
216	8/4/2017	1/10/2018	Section 15 (b)							N/A	Incident, No Injury	The consumer stated that a wheel came off of her stroller.
217	8/11/2017	8/11/2017	Section 15 (b)					Oakline	IL	N/A	Incident, No Injury	The front qr came undone while running, stroller flipped, bent fork, kids are okay.
218	8/15/2017	8/21/2017	Section 15 (b)							Unk	Level of care not known	One of the tires blew up. The kid had few scratches because the stroller skidded
219	9/6/2017	1/10/2018	Section 15 (b)							N/A	Incident, No Injury	The consumer stated that while running with the stroller in swivel mode, the front wheel fell off. No injuries.
220	9/9/2017	1/10/2018	Section 15 (b)					CHARLESTON	SC	22 MOM	Emergency Department Treatment Received	A 22-month-old boy suffered a lump and bruise to his forehead when the jogging stroller he was strapped into turned upside down. The child's father had been running behind the stroller when the unit's single front wheel unexpectedly detached allowing the fork to catch on the gravel path. The resulting sudden stop caused the father to crash into the stroller's handlebar and flip the unit forward over its nose. The child received treatment at a local emergency room.
221	9/12/2017	1/10/2018	Section 15 (b)					Kansas City	KS	N/A	Incident, No Injury	Female consumer was walking in a store when the wheel on the stroller detached. 5 1/2 mo/ in the stroller bumped her head on the left side of the frame but was not injured. The wheel was unlocked during the incident.
222	9/14/2017	1/10/2018	Section 15 (b)							N/A	Incident, No Injury	Consumer stated that [baby stroller] front wheel fork is damage while jogging and qr bent.
223	9/19/2017	1/10/2018	Section 15 (b)							N/A	Incident, No Injury	Consumer's son was running & [baby stroller] front wheel fell off, she didn't know when this happen, no one was injured.

224	9/19/2017	1/10/2018	Section 15 (b)								Consumer stated that front wheel came off their stroller and they flipped completely over. Waiting on no injuries were reported.
225	9/20/2017	1/10/2018	Section 15 (b)								Consumer stated that front fork damaged running with front wheel swivel, no injury.
226	9/26/2017	1/10/2018	Section 15 (b)								Consumer reported that his gr is bent and the front wheel popped off while running and it will not go back on
227	10/2/2017	1/10/2018	Section 15 (b)								Consumer stated that front wheel detached from [baby stroller] while walking gr detached and fork stuck in grass. 2 1/2 yo child was not harnessed and fell in grass, mother states child was fine, no injury.
228	10/3/2017	1/10/2018	Section 15 (b)								Consumer stated that gr came off, no injury.
229	10/4/2017	1/10/2018	Section 15 (b)								Consumer was running with two kids in stroller, one in carrier and the front wheel fell off. She was running with the front wheels in swivel mode.
230	10/6/2017	1/10/2018	Section 15 (b)								Consumer states that her front wheel came off of stroller. She also states that her fem buckle for her duallie came off.
231	11/20/2017	1/10/2018	Section 15 (b)								Consumer was walking and pushing the stroller. Front wheel made a noise, front axle broke, front wheel detached and 2 yo child rolled out of stroller. Front wheel was not locked and consumer is against locking it while jogging or running. Was advised to lock wheel. Replaced front wheel and quick release. Child had scraped elbow.
232	11/22/2017	1/10/2018	Section 15 (b)								Consumer was running on golf path with a dual stroller and had one 2 yo child harnessed on right side. The wheel wobbled, consumer straightened it and it partially detached a short distance later, it wasn't straight. Stroller flipped forward and child sustained small bump and scrape on forehead, went to er to get checked out. Front screw was bent on the stroller.
233	11/28/2017	1/10/2018	Section 15 (b)								Consumer had been running for 27 min at 10 mph on paved, dry side road when wheel wobbled then popped off. She bruised palms of hands when front wheel detached, causing stroller to flip. Child was harnessed and had no injury. It was purchased in July, 2017. <input type="checkbox"/>
234	3/16/2018	3/28/2018	Consumer								A consumer complained the bottom leg seatbelt strap in his double stroller ripped and snapped while he was jogging and his 3 year-old son was sitting in it. The consumer stated the victim hit his left thumb in the center console, but no medical treatment was needed.

235	4/14/2018	4/25/2018	Consumer			SCOTT AFB	IL	5 YOF	Level of care not known	My daughter wanted to accompany me on a run, not the first time but rather a habit. I proceeded to check the tire pressure and fill up the tires to the recommended psi and check the hardware and straps to ensure everything was in working order and safe for both of us. We were well on our way and a mile into the run the front wheel shook for a moment then the next moment I fell forward due to the stroller wheel coming out of place and my child was face down in the stroller, on the ground. We both where horrified and as a parent I lost any confidence that baby jogging stroller was a trusted product to have my child in. I expected more from a high end stroller and now face a long road ahead as a military member of not being able to use a vital tool for the maintaining of mandatory level of acceptable fitness. Thank you for fielding my concerns
236	4/20/2018	4/21/2018	Consumer			Providence	RI	N/A	Incident, No Injury	While a 34-year-old female was jogging behind a 3-wheel jogging stroller with her 15-month-old son seated inside of it, the front wheel quick release detached and fell on the path below. She then stopped and found that the front wheel was being held in place between the forks only by the brake pads. There were no injuries resulting from this incident.
237	4/20/2018	4/3/2019	Consumer			Reston	VA	3 YOM Unk	First Aid Received by Non-Medical Professional	I have a bob revolution single stroller. I was running down a paved incline on a jogging trail when the front tire popped off. The stroller flipped forward, landing on the handle. My son was shaken up with a few scratches, but thankfully the harness kept him from suffering further harm. I was yanked forward as the stroller flipped with enough force to pull me to the ground. I had a few scrapes on my knees, but otherwise was okay. <input type="checkbox"/> at the time, I had no idea why the wheel had popped off. I only just learned this is a more widespread issue and I felt it important to report the problem.
238	7/9/2018	10/22/2018	Section 15 (b)			STANFORD	CA	1 YOM	Level of care not known	Mother was running in jogging stroller. Another child with a bike crashed. Wife put the stroller park break on abruptly. Consumer was on an incline. Park brake was not set. Consumer went to help injured child on the bike and the stroller rolled down hill into a ditch. The 1 yom was a seat belied in. Child has small bump on his head and a scratch on his head. The stroller flipped over in the ditch. Consumer states it rolled off the path into a ditch.

239	8/2/2018	4/5/2019	Consumer				32 YOF	No First Aid or Medical Attention Received	I was jogging along and ran over a bump and the front wheel of my stroller popped off. The stroller went vertical. I slammed into it, but I was going slow enough that I luckily didn't topple over the top. My little one was strapped in and fine since I was able to stop the stroller from falling all the way over.
240	10/24/2018	10/25/2018	Consumer	[REDACTED]			Eagle ID Unk Unk Unkm	No First Aid or Medical Attention Received	<p>Caller says that front wheel of the stroller falls off while in use. Caller says that it has happened multiple times. Caller says that last week the wheel popped off while going down a bridge. Both children fell out of the stroller and face first onto the concrete. There were knots on their heads. No medical treatment was required. <input type="checkbox"/></p> <p>10/24/18 caller was running with the stroller on a trail when the wheel popped off again. Caller says that both the children fell face first into the trail and he flipped over the stroller landing on top of them. Caller also sustained minor injuries to his knee during the incident. No medical treatment was required. <input type="checkbox"/></p> <p>Caller spoke with the manufacturer and they informed him that he did not lock the swivel in place, therefore he did not follow the user guide and they cannot assist him with a refund of the product. Caller says that he cannot run with the stroller if you lock the swivel in place. He is only able to go in a straight line while it is locked in place.</p>
241	12/8/2018	12/8/2018	Consumer		CHICAGO	IL	N/A	Incident, No Injury	We have the bob revolution flex running stroller. When running with the front wheel in the "locked" position. The lock will gradually work its way up, suddenly releasing the wheel to "swivel" mode. This creates an unsafe, often times violent jerk of the stroller that could lose control or flip with the child in the stroller.

242	1/6/2019	4/10/2019	Consumer			Huntersville	NC	28 YOF 2 YOF	First Aid Received by Non-Medical Professional	My wife was using our b.O.B. Revolution stroller to go for a run with my 2 year old. She was about a mile into her run and a mile away from the house. She was running down the road and onto a trail when the front tire came off suddenly. This caused the stroller to nosedive and flip, and her to go over top of the stroller. Thankfully she and my 2 year old escaped with minor scrapes and bruises, but it could have easily been a whole lot worse. There was no one around to help. She had to leave the stroller and walk back to the house, as the impact from the accident had bent the bolt on the front tire. Someone can seriously be hurt when this happens and for the price you pay for these strollers, they need to be recalled.
243	4/2/2019	4/3/2019	Consumer					N/A	Incident, No Injury	The britax bob stroller is not safe. The front wheel falls off causing the stroller to fall over
244	4/13/2019	4/17/2019	Consumer					N/A	Incident, No Injury	<p>Have a bob revolution flex running stroller [manufacture date 8/2015]. After reading the washington post article, i checked the front wheel and was alarmed to see that it was loose. Followed instructions when setting up the stroller, have had bicycles my entire life and i'm quite comfortable using quick connect bolts for wheels. I've never had one get loose before. <input type="checkbox"/></p> <p>i attempted to contact bob to request a free replacement bolt (per their agreement with the cpsc) but did not hear from them for &gt;72 hours, at which point i called them. According to the representative, they will send me a new bolt.</p>
